Summary

Hi, I'm Rahul Rajput, a self-taught developer who genuinely enjoys building things.

I focus on creating products that are reliable, scale when they need to, and look clean without trying too hard. Full-stack development is where I'm most comfortable: clear APIs, solid backend foundations, and interfaces that feel smooth rather than flashy.

When I'm not working, I spend time exploring new technologies, sharpening my skills, and contributing to open source projects.

Experience

Tayst AI

December 2025 · Present

Technical Lead

New York, Remote

I'm responsible for leading the development of the company's backend, frontend and microservices infrastructure, ensuring scalability and reliability.

Tayst AI

September 2025 - November 2025

Founding Engineer

New York, Remote

As a Founding Engineer at Tayst, a U.S.-based startup, I'm building the company's scalable backend and microservices infrastructure, while also contributing to the frontend to deliver a seamless user experience.

Portals

March 2025 - June 2025

Frontend Developer

London, Remote

Built and maintained all dynamic pages for the startup's web platform using Next.js, React, TypeScript, and Tailwind CSS. Focused on creating responsive, high-performance UIs and integrating APIs to deliver a smooth user experience. Collaborated directly with the founding team on product features and frontend architecture.

OpenSource Contributor

August 2024 - Till Date

Community Builder

Remote

I also love contributing to open source! I've built a bunch of open-source projects myself from web apps, apis, micro apps to backend systems and even some AI stuff. Plus, I've contributed to several other open-source projects along the way.
